Async Activity

1.

- Find GCF : $7x$

Divide: $14x^2/7x = 2x$, $21x/7x = 3$

Answer: $7x(2x + 3)$

2.

-Find GCF: $5a^2b^2$

Divide: $20a^3b^2/5a^2b^2 = 4a$, $-15a^2b^3/5a^2b^2 = -3b$

Answer: $5a^2b^2(4a - 3b)$

3.

-Difference of squares formula: $a^2 - b^2 = (a - b)(a + b)$

Identify terms: $a = x$, $b = 8$

Answer: $(x - 8)(x + 8)$

4.

Difference of squares formula: $a^2 - b^2 = (a - b)(a + b)$

Identify terms: $a = 7m$, $b = 4$

Answer: $(7m - 4)(7m + 4)$

5.

Factor GCF: $5x(x^2 - 9)$

Factor difference of squares: $x^2 - 9 = (x - 3)(x + 3)$

Answer: $5x(x - 3)(x + 3)$
